Aerospace Tools Catalogue

Aerospace Tools Catalogue

Bahco aerospace tools. Safety that gives your service the edge.

Tough demands deserve the best solutions. Therefore, when major airlines choose aerospace working tools from Bahco they choose them for their precision and reliability. You don't get second chance when you are tens of thousands feet above ground.

Our reputation for exacting precision and quality ensures tools that have been exhaustively tested to meet the tough quality requirements of the aerospace industry. Your service tools may never have to sustain launch, orbit and re-entry, but they will have to survive the tough tests of precision, cost-efficiency and long-term reliability.

Achieving this may appear a difficult task for some. To us it is a way of life. Ask any user what Bahco quality means to their operations. Tools that are always up to specification and that provide value for money.

Contents

Notes	140

Bahco Aviation Mechanics Tool Box.

We have developed a system for tailor made mechanics tool boxes. The upgraded standard tool box with two colour inlays (for safety reasons) is for service and repair in the aircraft hangar. We have now equipped the box with our tools including Ergo tools for airlines and airports.

Mechanics Tool Box.
Art. No. 3126N-LHFR

Each tool has its own place with a distinct colour mark, – which makes a missing tool easy to detect.

Tough demands deserve the best solutions. So when major airlines choose Bahco aerospace working tools they choose them for their precision and reliability. You don't get second chances when you are tens of thousands of feet above ground.

Our reputation for exacting precision and quality ensures tools that have been exhaustively tested to meet the tough quality requirements of the aerospace industry. Your service tools may never have to sustain launch, orbit and reentry. But they will have to survive the even tougher tests of precision, cost-efficiency and long-term dependability.

Achieving all this may seem a hard task for some. To us it is a fact of life. Ask any user what Bahco quality means to their operations. Tools that are always up to specifications and for which we have always proven the ultimate value of their purchase decision.

A range of Bahco spanners to suit demanding applications.

To accommodate the safety and precision demands of aerospace applications, the Bahco spanners are designed and manufactured to suit the workplace. They have thin, flat heads with narrow tolerances, an optimized shape and are comfortable to hold. Their shape – thin heads for hard-to-reach spaces, rounded shafts and contoured heads – allow higher loads and ensure comfortable, non-slip handling. Made of Vanadium Extra steel and with smooth, polished chrome-plated surfaces, they provide a long life and are easy to clean.

6M Double open-end spanner, Metric

DIN 3110/ISO 1085.

Finish: Nickel and chrome-plated, fine-polished.

Sizes 41-46 mm and 46-50 mm nickel and chrome-plated.

Material: VANADIUM-EXTRA. Angle 15°.

Model with extremely flat heads.

1RMA / Adaptor set

Finish: Nickel and chrome-plated, fine-polished.

Material: CrV.

1RMA/S4: Set of ratcheting wrench adaptors. ISO 1174/DIN 3120.

Adaptors for 1/4", 3/8" and 1/2" sockets with quick release press button.

Adaptor for 1/4" bits with retaining ring. Supplied with a compact plastic pocket box.

1RMA/S8: Set of ratcheting combination wrenches and adaptors. ISO 3318/DIN 3113 and ISO 1174/DIN 3120.

Ratcheting wrenches 1RM-10, -13, -19 with 5° ratchet action, reverse lever and 15° offset.

Adaptor for 1/4", 3/8" and 1/2" sockets with quick release press button.

Adaptors for 1/4" and 5/16" bits with retaining ring. Case in high density Polythene (HDPE).

The sixth generation of the ORIGINAL Adjustable wrench since 1892.

90C 90-series, chrome-plated

As per DIN 3117 Form A, angle 15°, BS 6333, ISO 6787 and ASME B107. 8M-1996.

Finish: Chrome-plated.

Precision-hardened and anti-corrosion treated. With comfortable thermoplastic handle and larger grip width. The sixth generation of the adjustable wrench.

Performance sockets and socket sets to suit your needs.

Bahco sockets, ratchets and socket sets match your highest requirements for power, safety and precision. Sockets, drive handles and attachments are made to exacting tolerances and provide excellent resistance to wear. Manufactured with thin walls and made of chrome plated Vanadium-Extra steel, they will continue to deliver superior performance when other tools have already failed.

Easy to carry and use, Bahco socket sets are available in many sizes and styles, each optimized for maximum flexibility in service and maintenance tasks. All parts are made of Chromo- and Chrome Extra steel conforming to tensile strength and tolerances stipulated in ISO/DIN standards.

Whichever set you choose you will experience tools manufactured to the highest standards of precision and safety.

6700SM Hexagon socket, Metric  1/4"

7750 Reversible ratchet

DIN 3122 and 3123.

3/8" 10 DIN 3120/ISO 1174.

Finish: Nickel and chrome-plated, fine-polished.

Material: VANADIUM-EXTRA.

With plastic grip, 34 teeth, 10.6° action and with quick release button.

Product code	EAN 731415+			
7750	1096427	1	200	235

7750RN Reversible ratchet

DIN 3122 and 3123.

3/8" 10 DIN 3120/ISO 1174.

Finish: Nickel and chrome-plated, fine-polished.

Material: VANADIUM-EXTRA.

With plastic handle, 60 teeth, 6° action.

Product code	EAN 731415+			
7750RN	1831240	1	200	255

7710 Reversible flex-head ratchet

DIN 3122 and 3123.

3/8" 10 DIN 3120/ISO 1174.

Finish: Nickel and chrome-plated, fine-polished.

Material: VANADIUM-EXTRA.

With Flex-head and plastic handle. 60 teeth, 6° action.

Product code	EAN 731415+			
7710	1551445	1	280	340

7755-3/8 Reversible ratchet, single hand operation

DIN 3122 and DIN 3123.

3/8" 10 DIN 3120/ISO 1174.

Finish: Nickel and chrome-plated, fine-polished.

Material: VANADIUM-EXTRA and two component handle.

72 teeth, 5° action. The new ratchet generation: Easy change of direction with one hand by a short turn of reversing ring, leaving the other hand free to steady the workpiece. Locking mechanism keeps the socket captive. Easy change of sockets by pressing the quick release button. The integrated quick-rotary disc simplifies and accelerates the fastening and release of all kinds of easy running fasteners. Patented.

8155-1/2 Reversible ratchet, one hand

DIN 3122 and DIN 3123.

1/2" 12.5 DIN 3120/ISO 1174.

Finish: Nickel and chrome-plated, fine-polished.

Material: VANADIUM-EXTRA and two component handle.

60 teeth, 6° action. The new ratchet generation: multi-functionality in perfect design. Easy change of direction with one hand, by a short turn of the reversing ring, while the other hand may safely fix the workpiece. Locking mechanism keeps the socket captive. Quick change of sockets by pressing the locking button. The integrated quick-rotary disc simplifies and accelerates the fastening and release of all kinds of easy running screwings. Patented.

SB = Retail packed on a plastic info card.

7980NZ Socket set, Inch

1/2" 12.5 DIN 3120/ISO 1174.

Finish: Nickel and chrome-plated, fine-polished.

Material: VANADIUM-EXTRA.

In red, Skydrol-resistant baked enamelled metal box. Sockets with Dynamic-Drive-Profile™.

7885M Socket set, Metric

1/2" 12.5 DIN 3120/ISO 1174.

Finish: Nickel and chrome-plated, fine-polished.

Material: VANADIUM-EXTRA.

In red, Skydrol-resistant baked enamelled metal box. Sockets with Dynamic-Drive-Profile™.

SL25 Socket set 1/4" drive

DIN 3120 /ISO 1174.

Finish: Matt chrome-plated.**Material:** Chrome Vanadium. Case in High Density Polythene (HDPE). **Contents:** 25 pieces.

12 pcs 1/4" 6-pt Sockets Dynamic-Drive-Profile™

4, 4.5, 5, 5.5, 6, 7, 8, 9, 10, 11, 12, 13 mm.

1 pce ratchet 1/4" compact length (only 125 mm) with two component handle and quick release button. 2 pcs bit 1/4" PH 2.

2 pcs bit HEX 5, 6. 6 pcs bit TORX

10, 15, 20, 25, 30, 40.

1 pce bit holder 1/4" with locking spring, 1/4" female square.

1 pce 1/4" wobbler extension bar,

length 100 mm.

Torque tools made to measure.

Using innovative design and manufacturing techniques, our family of torque measuring tools offers benefits such as greater reliability, flexibility and ease of use. All with a measuring precision that fulfils the exacting requirements of aerospace applications. Simply select the tool or combination of tools you want, depending on the degree of sophistication your application requires.

IZO-DR Torque wrench

Electronic tools which combines accuracy and ease of operating of modern electronic torque tools with a feelable signal when the set torque range is reached. This provides a modern and precise alternative to conventional mechanical torque tools. Feedback by feeling – FEELBACK. The correct torque value is sensed by your hand – you can trust what you feel.

- Tool body made from quality stainless steel with break-proof display cover.
- Tool handle from glass fibre filled nylon incorporating a softer more comfortable santoprene grip.
- Ranges programmable in Nm, Lbf.ft, Lbf.in.
- 2 scroll keys, for fast and easy programming, which are secured against accidental altering. Programmable torque value with tolerance accuracy $\pm 2\%$.
- Quick battery change with data and set value retention during battery exchange. Power safe feature and low battery warning.
- Auto zero check on power up.
- Dust and splash water protection.
- Operating temperature range: 5 °C – 42 °C and storage temperature range: -10 °C – 50 °C.
- Supplied with fixed ratchet head and three AA batteries.

IZO-DM, IZO-DFM and IZO-DRM Torque wrench

Electronic torque tools combine accuracy and ease of operating of modern electronic torque tools with a feelable signal when the set torque range is reached. This provides a modern and precise alternative to conventional mechanical torque tools. Feedback by FEELBACK: The correct torque value is sensed by your hand – you can trust what you feel.

- Tool body made from quality stainless steel with break-proof display cover.
- Tool handle from glass-fibre filled nylon, incorporating a softer more comfortable santoprene grip.
- Ranges programmable in Nm, Lbf.ft., Lbf.in. 2 scroll keys for fast and easy programming, which are secured against accidental altering. Programmable torque value with tolerance accuracy $\pm 2\%$, ± 1 digit.
- Quick battery change with data and set value retention during battery exchange. Power safe feature and low battery warning.
- Wrench gives up to 100 hours of continuous operation. Auto zero check on power up.
- Dust and splash water protection.
- Operating temperature range: 5 °C – 42 °C and storage temperature range: -10 °C – 50 °C.
- Memory capacity 1000 values. Storage of fastener No., unit of measurement and memory recall of stored data with fastener No.
- PC software (Excel format), RS 232 serial link. Supplied with reversible ratchet head, software, cable and three AA batteries.

6973N-6978N Torque screwdriver with scale, adjustable

Micro adjustable torque screwdriver comfortable shape and user friendly designed grip. Cam-over torque limiting clutch for repeatability and accuracy. Accuracy: ± 6% according DIN/ISO 6789 EN 26789/1994. Easy to read scale under the display. 1/4" hexagon socket retainer with magnet for all bits (1/4" 6.3 DIN 3126, ISO 1174). The additional adapter makes it possible to use 1/4" sockets (1/4" 6.3 DIN 3120, ISO 1174).

6981/7481/8181 Double-scale torque wrench

Indication torque wrenches for precise, rapid and easy working.

Finish: Housing black grey, tube pure orange with profiled rubber handle. Handle gives comfortable and positive grip.

Advantages and quality features:

- The unique spiral spring principle results in higher precision and more reliability throughout the scale range.
- Accuracy is in accordance with DIN/ISO 6789/EN 26789/1994.
- Slender main indication needle and slave pointer for precise reading and setting of the torque value.
- Light weight, easy handling, robust and reliable.
- Connecting square on either side to fasten or loosen right hand or left hand threads.
- Integrated ratchet for work in confined and restricted spaces, except for model No. 9581.

BE-6990-AH

4" female hexagon drive. **Material:** Three component handle made of polyamide, ESD Nitrile rubber, shore hardness 70 degrees and aluminium alloy with anodised black finish.

- Accuracy: +/- 6 %.
- Setting: Torque is increased by turning clockwise and decreased by turning anti-clockwise. Adjustment can be made easily and accurately with a torque calibration rig.
- T-handle: In order to apply the required torque with less effort, the self-locking T-handle can be inserted into the 1/4" female square at the handle.

7451/7851 Torque wrenches with scale

Window clicker wrench.

Finish: Chrome-plated. Easy to read "window" scale.

Accuracy: ± 3%, single direction. A pull down locking knob on a grip for quick and easy torque adjustment. Single torque scale for easy use. Fixed ratchet head, 32 teeth, 11,25° action. Locking mechanism keeps the socket captive. Quick change of sockets by pressing the release button. Handle customised to give optimum user comfort and with a 0.1 Nm graduation.

8952F Torque wrench with scale, socket accommodation

Finish: Nickel and chrome-plated.

Material: VANADIUM-EXTRA.

- Reliable and rugged construction.
- Light weight, easy handling, slender, modern design.
- Easy to read measuring scale (Nm).
- When the preset torque value is reached the signal can be felt and heard.
- Lockable handle prevents accidental alteration of torque value.
- Accuracy is in accordance with DIN/ISO 6789/EN 26789/1994.
- Right-hand turn for controlled screw tightening (the torque wrench can also be used for controlled left screw tightening, when turned over by 180°). Left turn to loosen screws without torque indication.
- Micrometer measuring system.
- Signalling (automatic disengagement).
- Engraved scale.
- Setting handle with comfortable, fine-profile plastic hand-protection and a graduation of 2 Nm.
- Lockable for work with alternating torque values.
- Each torque tool is supplied with a serial number and a warranty certificate of its own.

Impact tools and bits with power to spare.

Made for superior performance in any application, Bahco impact tools and bits offer the power, precision and safety needed in demanding tasks, whether used with an impact spanner or a power driver. A complete and wide assortment of bits and impact sockets are available from our main catalogue.

DF/ Impact socket short, 3/8"

DIN 3129, ISO 2725.
Sockets in metric sizes.
Drive: 3/8"
DIN 3121- F 10/ISO 1174.
Finish: Cold forged, phosphated.
Material: CHROMO-EXTRA.
Sockets length 25 mm, 14, 15, 16, 17, 18, 19 mm with length 28 mm.
With Dynamic-Drive-Profile™. 2 pcs removable three section plastic box. For safety, use clamping springs!

Screwdrivers with superior performance.

Many sophisticated aerospace applications demand the superior precision and flexibility offered by our range of screwdrivers. With a hardened, fine-polished Vanadium-Extra blade, black oxidized tip and non-slip ergonomic handle they are easier to use, more comfortable to hold and significantly more functional. And finding the right tip is as easy, due to the permanent colour coding on both ends of the handle.

BE-8010–BE-8252 For slotted head screws 

Finish: Blade fine-polished and bright chrome-plated, entirely hardened, tip black oxidized. Permanent colour code on both ends of handle for easy identification of screw type.

Material: Blade of VANADIUM-EXTRA. Ergonomically developed 3-component handle of polypropylene and thermoplastic elastomere.

DIN 5265, ISO 2380-2.

Tip DIN 5264-A, ISO 2380-1.

* additional sizes not included in the norm.

BE-8702 – BE-8710 For hexagon socket head screws 

Finish: Blade fine-polished and bright chrome-plated, entirely hardened, tip black oxidized. Permanent colour code on both ends of handle for easy identification of screw type.

Material: Blade of VANADIUM-EXTRA. Ergonomically developed 3-component handle of polypropylene and thermoplastic elastomere. The ball end enables working with hexagon socket head screws in difficult-to-reach positions at angles of up to 30°. This screwdriver is a particularly time-saving tool, because of – quick and easy insertion into the socket head – natural turning movement of the hand without re-inserting the screwdriver tip. It is used in many industries including mechanical engineering, precision engineering, shipbuilding and automotive industries.

BE-8710 with double handle.

BE-8010S–BE-8065S IEC insulated for slotted head screws

For work on live equipment up to 1000 volts.
IEC 60900, EN 60900, DIN-EN 60900, VDE 0682 part 201.
Examination of screwdrivers according to latest national and international standards:

- Examination piece-wise in water bath with 10 KV.
- Marking with the year of manufacture.
- Intensified cold stroke test.

Finish: Blade fine-polished and bright chrome-plated, entirely hardened, tip black oxidized. Permanent colour code on both ends of handle easy identification of screw type.

Material: Blade of VANADIUM-EXTRA. Ergonomically developed 3-component handle of polypropylene and thermoplastic elastomere. DIN 7437.

Tip DIN 5264-A, ISO 2380-1.

2003F Precision screwdrivers 
for slotted head screws

For the electronics, fine-mechanics and optics industries.

Finish: Blade black oxidized, entirely hardened, red transparent plastic handle with rotating conical hexagon-shaped aluminium finger tip, cap is for easy operation.

Material: Blade of VANADIUM-EXTRA. Handle of cellulose acetate, impact resistant. These special screwdrivers have been designed for watchmakers and precision machinists as a result of practical requirements studies. They cover the entire range of slotted screws, from M 0.3 to M 1.4.

BE-9775-BE-9785

Finish: Black oxidized. The ball end enables working with hexagon socket head screws in difficult-to-reach positions at angles of up to 30°.

This wrench is a particularly time-saving tool, because of – quick and easy insertion into the socket head – natural turning movement of the hand without re-inserting the tip. It is used in many industries including mechanical engineering, precision engineering, automotive and ship building etc.

Material: CHROME-VANADIUM.

Pliers that make a difference.

Improving the performance and precision of handtools relies on a commitment to better designs and materials. The wide range of Bahco cutters and pliers meets the high quality demanded from professional tools today. The alloying of steel, advanced hardening methods together with precision engineering in a controlled manufacturing process is a guarantee for this. This also means that our cutters and pliers easily meet ISO and DIN standards. The result is a range of pliers with performance that really makes a difference, in all demanding application.

2101GC Side cutting pliers

ISO: 5749. DIN: 5749.

Finish: Nickel- and chromeplated, anti-corrosion treated.

Material: CHROME-VANADIUM steel. With Ergo handles in two-material combination. Thermoplastic surface on tough polypropylene which gives a superior grip.

Shape: An "open" joint, in which the distance from the joint centre to the cutting edges is reduced, results in greater leverage and increased cutting capacity. Progressive cutting edge which cuts hard material near the joint and soft materials at the tip. Round shaped jaws give improved accessibility in confined spaces. Equipped with a return spring featuring an on/off function.

Application: The progressive edges are designed to cut hard material such as piano wire close to the joint and to cut softer material such as copper wire and plastic insulated wire at the tip.

Cutting capacity: Piano wire.

IP = Industrial Pack.

3419A Automatic wire-stripping pliers

For conductors with PVC insulation. Precise stripping without damaging the cables, even in confined spaces where the conductors are difficult to reach. The blades automatically adjust to the respective conductor cross section from 0.08 to 1.00 mm² (AWG 28-17). Built-in wire cutter for conductors up to 1.00 mm², safe, with hand protection. Adjustable stripping length from 2.5 to 7.0 mm.
No. 3419A Wire stripping pliers.
No. 3419EA Replacement blade.

3419B Electrician's wire-stripping pliers

Light, almost unbreakable casing made of fibreglass reinforced polyamide, resistant to chemicals and corrosion. For stripping and cutting wire and cable in the diameter range 0.1-6.0 mm, such as fine wires and wires with PVC thick insulation of all hardness, stranded wires (for thin flat ribbon cables also multiple wires in one operation) and double insulated cable, in two steps without adjustment. Adjustment of the insulation strip length from 3-16 mm (0.12-0.65 inches). The tool will be delivered with the adjustment wheel in the middle position for the diameter range 0.5-4.0 mm² normal insulation. The wire cutter should only be used for copper and aluminium wire.
No. 3419B Wire stripping pliers.
No. 3419EB Replacement blade.

2430GC Snipe nose pliers

ISO: 5745. DIN: 5745.

Finish: Black oxidized, anti-corrosion treated.

Material: CHROME-VANADIUM steel. With Ergo handles in two-material combination. Thermoplastic surface on tough polypropylene which gives a superior grip.

Shape: Slim, semi-circular shaped and serrated jaws. Accurately machined jaws provide a sure grip on the workpiece. Equipped with return spring with on/off function.

Application: Tips give good grip and improved accessibility in confined spaces. Sharp edges for cutting softer material such as copper wire and plastic insulated wire.

Cutting capacity: Hard steel wire. Model identical to 2430G but nickel and chrome-plated for better rust protection.

2650 Connector pliers

For specific use in the aviation industry. With interchangeable nylon inserts and slip joint. Adjustable to three positions.

These pliers are especially suited for adjusting connectors on engines, for plumbing and work with light metals and threaded pipe joints, where surfaces must not be damaged. The slim jaws permit work in very confined spaces.

Finish: Nickel and chrome-plated, fine-polished.

Material: VANADIUM-EXTRA.

PVC coated handles.

No. 2650B spare nylon inserts (per pair).

1175 Universal pipewrenches

Multi purpose pipewrench with ergonomical design. DIN 5234. Nickel and chromeplated and anti-rust treated high-alloyed, hardened special steel with precision induction hardened jaws. Outer handle of hardened sheet metal with ergonomically designed soft, warm-to-the touch, high friction handle with a strong, stable core. Thermoplastic surface on tough polypropylene gives a superior grip. Optimized design with narrower jaws gives perfect accessibility, also in cramped corners. Patented progressive teeth angled aggressively inwards, fine at the inner part of the jaws and larger at the outer part gives a better grip on all sizes of pipes. The inner handle with built-in protection against pinching and a safety stop for the adjusting nut. Suitable for use with the pipe wrench lock 142-3.

2855 Wire twisting pliers

Application: Extremely fast time-saving exact twisting. Can be used for any wire length and any twist length. When the pliers grip the wire any number of twists can be made by pulling out and pushing in the spinner knob. The reversible models eliminate the need for additional tools, by turning the patented reversing sleeve the tool has left or right hand twisting capabilities. This is a tool for securing with wire all critical places which are exposed to vibration.

Capacity: Perfectly twists wires up to Ø 1.04 mm (.041") including stainless steel wire. **Finish:** Black finish, corrosion treated, polished head.

Material: VANADIUM-EXTRA.

Shape: Jaws angled at 30° and serrated. Diagonal nose configuration. With additional cutter.

Product code	EAN 731415+	Box icon	A mm	B mm	C mm	D mm	E mm	F mm	G mm	Weight g

2979D Nut pliers

Finish: Black oxidized, anti-corrosion treated special steel.

Application: Service pliers for nut and bolt dimensions with 3-13 mm across-flats widths.

Shape: The design of the handles ensures good access in confined spaces. Serrated and slightly conical gripping surfaces for good grip round the hexagon.

Gripping capacity: 3-13 mm.

Product code	EAN 731415+	Box icon	A mm	B mm	C mm	D mm	E mm	F mm	G mm	Weight g
2979 D-180	0034246	5	180	12	23	11.5	5	3	17	200

2855D Wire twisting pliers

Application: With reversing switch automatic mechanism and additional cutter. These pliers can be used for any wire length and any twist length. When the pliers grip the wire and are locked, a number of twists can be made very quickly. The reversing switch mechanism allows a right and left twist of the locking wire, which is essential with continuous and successively lying screw fittings.

Due to the automatic return of the twist axle the locking wire is twisted and ready in one single operation, making this a faster method of working. These pliers may also be used as side cutting or gripping pliers. This tool is ideal for securing with wire, all fixings which are exposed to vibration.

Capacity: Wires up to max Ø 1.6 mm (0.60"), including stainless steel wire.

Finish: Black finish, corrosion treated, polished head.

Material: VANADIUM-EXTRA

Shape: Jaws angled at 30° and serrated.

Product code	EAN 731415+	Box icon	A mm	B mm	C mm	D mm	E mm	F mm	G mm	Weight g
2855 D	1822569	1	282	29	20	10.5	5	4	10	525

2855QT Wire twisting pliers

Application: Extremely fast, time-saving, exact twisting. Can be used for any wire length and any twist length. When the pliers grip the wire any number of twists can be made by pulling out and pushing in the spinner knob. This reversible model eliminates the need for an additional tool.

Shape: Jaws angled at 30°. Wave Jaw holds wire securely and eliminates nicks and scrapes on wire. Cushion throat traps cut wire. With additional cutter.

Application: Extremely fast, time-saving, exact twisting. Can be used for any wire length and any twist length. When the pliers grip the wire, any number of twists can be made by pulling out and pushing in the spinner knob. This is an ideal tool to secure, with wire, all critical places which are exposed to vibration.

Finish: Black finish, corrosion treated, polished head.

Material: VANADIUM-EXTRA

Capacity: Wires up to Ø 1.04 mm (.041"), including stainless steel wire.

2855DQT Wire twisting pliers

Application: Extremely fast time-saving exact twisting. Can be used for any twist length. When the pliers grip the wire, any number of twists can quickly be made. The reversing mechanism allows right and left twists of the locking wire. This is essential with continuous and successively lying screw fittings. The locking wire will be twisted and ready in one single operation. This is a faster working method through automatic return of the twist axle. These pliers may also be used as side cutting or gripping pliers, because the centre position to the switch thrust arrests the twist axle. This is an ideal tool to secure, with wire, all critical places which are exposed to vibration.

Capacity: Wires up to max Ø 1.6 mm (0.06"), including stainless steel wire.

Finish: Black finish, corrosion treated, polished head.

Material: VANADIUM-EXTRA.

Shape: Wave jaws angled at 30°.

Wave jaw holds wire securely and eliminates nicks and cuts on wire. Cushion throat traps cut wire. With reversing switch automatic mechanism and additional cutter.

9938 Set of circlip pliers

Set of three re-settable pliers for both internal and external circlips from the 2928.
Series: 160, 200 and 250 mm. These patented pliers are equipped with interchangeable tips (straight, 15° and 90°) which can easily be adapted for use with internal or external circlips as required. 5 sets of tips are supplied with the -160 and 200 and 6 sets with the -250.
 The pliers can be used for internal circlips from 8 to 100 mm diameter and for external circlips from 3 to 100 mm.
 This set covers a range of applications previously requiring up to ten conventional pliers. The pliers have a regulation stopmechanism (automatic on the 2928-250 model) which makes use easier and prevents the circlips from being damaged due to excessive force being applied.

MA225 Aviation compound shears

Forged blades, made of specially hardened tool steel. Strong handles of glass fibre and nylon for safe and comfortable grip. Blade angles sharpened for long and consistent performance. Single hand operated safety lock.

Packaging: On informative card.

For straight cutting of hard and difficult-to-cut steel plate.

Cutting capacity:

- 1 - stainless,
- 2 - cold rolled.

Product code	EAN 731151+			1 mm	2 mm

RX 8143-RX 8145 Lindstrom Rx series diagonal cutters tapered head

These cutters are made from high performance ball bearing steel, black oxidised. Numerically controlled machine grinding guarantees edge angle accuracy and contact which increases the tools reliability and consistency. Precision induction hardened edges 63-65 HRC. Handles in two component synthetic material and come with return spring. The cutting capacity that is given is for copper wire! These tapered head cutters are ideal for assembly work where accessibility is a consideration.

Engineering files designed to fit the way you work.

To ensure long life, Bahco files are made of high-grade steel and carefully heat-treated to maximum hardness. Designed to withstand high pressure on the workpiece while cutting smoothly and evenly, they feature the right combination of sharp teeth and true body straightness. The result is superior long-term sharpness and durability. With ergonomically designed handles they also provide a safe, non-slip grip for maximum ease of use and precision work.

1-100...-3 Hand file industry pack, with handle 

For filing flat surfaces, sharp corners and shoulders as well as for deburring. A double cut file should be used for work in high-alloy tool steels. Also useful for the sharpening of heavy implements. High removal rate.

Shape: Edges and surfaces parallel. Surfaces double cut, one edge uncut, one edge single cut.

Type of cut: 1 = Bastard, 2 = Second, 3 = Smooth.

Cutting edge hacksaws.

Lightweight, sturdy and compact, and with high blade tension, Bahco hacksaw frames offer exceptional ease of use, accessibility and precision. Together with a wide choice of conventional as well as a variety of shatterproof bi-metal blades with different toothings they cover an extremely wide range of demanding applications and specific needs.

3906 New Sandflex® Bi-metal

The virtually unbreakable and shatterproof bi-metal blade with precision ground teeth for all kinds of metal sawing. With a blade back of strong, flexible spring steel and a tooth line in high-alloyed super high speed steel, this blade is guaranteed to keep its sharpness for a long time. The new Sandflex® blade combines extreme cutting performance and wear resistance with a high degree of flexibility and is vastly superior to all-hard high speed blades or conventional, flexible blades. Packaging of -100: 10 bundles of 10 blades in black, plastic box with transparent cover. -100-RET: 100 individually bar coded blades in a unique dispenser package. -10P: 10 blades in a special package with hanging loop. -5P: 5 blades in a special package with hanging loop. -3P: 3 blades, 1 each of 18, 24 and 32 TPI, in plastic pouch, box of 10 packs. -2P: 2 carded blades, box of 10 packs.

Electronics and fine mechanical tools that suit the job.

Whenever you may have a need for tools and tool sets that meet special requirements, you will find them in our assortment of special engineered tools made to measure for sophisticated electronics work and demanding fine mechanical applications. Each one of them based on the expertise that has established Bahco as the benchmark for quality and precision.

2816 Universal knives

Finish: Polished.

Material: LIGHT METAL.

Retractable blade knife with spare blade storage inside handle. Ideal for floor covering, rubber, cardboard, leather, wood etc. Sliding button for blade adjustment. Suspension hole and four standard blades in the handle.

Product code	EAN 731415+		 mm	 g
2816	1345501	1	160	67

2817 Fixed blade knife

With spare blade storage inside handle. Ideal for floor covering, rubber, cardboard, leather, wood etc. Suspension hole and four standard blades in the handle.

1157 Centre punch

Automatic centre punch which operates by hand pressure only, no hammer required. Hardened steel point.

Product code	EAN 731151+		 mm	 g
1157	8277031	25	140	19

2487 Carbon scraper

Rigid carbon scraper for gasket removal. Durable plastic handle with carbon steel blade. Blade 20 mm wide.

Product code	EAN 731151+		 mm	 g
2487	8276058	12	210	125

1162N Measuring tool

Measuring tape 3 metre with flexible steel pull-push tape, 13 mm wide with metric and inch graduations on both sides. For external and internal measurements.

Product code	EAN 731415+		
1162N-1/2	1847241	1	132

1150D Measuring tool

Digital caliper of stainless steel with mm and inch range from 0-150 mm in 0.01 mm increments. Depth gauge including limit and peak measurements. Supplied in protective box.

Product code	EAN 731151+		
1150D	8276614	1	290

1150-OM Measuring tool

Precision external micrometer with zinc anvil housing and stainless steel screw and handle.

Capacity: 0-25 mm in 0.01 mm increments.

Product code	EAN 731151+		
1150-OM	8276607	1	300

3046-OP Measuring tool

10X optical magnifier with built in LED light for easy inspections. 40000 hours of life under normal usage. 3AAA batteries required, 40-50 hrs of life under continuous use.

Product code	EAN 731151+				
3046-OP	8276980	6	30	90	100

1179 Measuring tool

Straight edge for use with feeler gauges to check for distortion in engine blocks, cylinder heads, flywheels, main bearing saddles, cam bearing saddles, cam covers and bell housings. Precision working steel hardened edge. Convenient hanging hole and edge protector.

Product code	EAN 731151+			
1179	8276102	10	450	1400

1179-FLX Measuring tool

Flexible stainless steel rule with pocket clip. With both inch and metric measurement scales.

Product code	EAN 731151+			
1179-FLX	8276997	100	160	9

1544 Measuring tool

Professional feeler gauges for adjusting governor gap. Includes 26 blades 0.03 mm to 0.1 mm in 0.01 mm increments and 0.10 mm to 1.0 mm in 0.05 mm increments.

Product code	EAN 731151+			
1544	8276560	1	76	77

1547 Measuring tool

Professional feeler gauge for adjusting governor gap. 20 blades in sizes 0.05 mm to 1.00 mm.

Product code	EAN 731151+			
1547	8276577	1	100	93

Extractors, pry bars and punches you can rely on.

The extensive range of Bahco extractors, pry bars and punches has one common feature: they are the best choice for every occasion. With wear resistance and precision beyond all others, they set the quality standards. Quality that increases efficiency and contributes to productivity.

4532 Universal two arm pullers

Finish: Galvanized, induction hardened spindle. From 4532-C arms and yokes are drop-forged.

Material: SPECIAL STEEL. By reversing the arms, the puller can be used as an internal or external puller. The large claw surfaces offer many advantages for careful and quick removal of pulleys, gears, ball bearings etc. The claw is milled to a slender and pointed form for easy access in confined spaces, such as in the automotive industry, for example. Legs are always gripping parallel. Leg tip extremely flat. Leg body extremely narrow. **4532-0** with slender special arm.

4521N Ball bearing internal extractors

Finish: Gunmetal finish.

Material: SPECIAL STEEL. The extractor shank has multiple slots (1-4). This allows uniform spreading on the periphery and safe removal of the ball bearing. For extracting ball bearings from housings, ball bearing outer races, bushings and oil seals. Extractor No. 4521 is inserted into the bore of the ball bearing so that the tapered lips of the puller jaws are positioned behind the inner race. This is possible even if the bearing fits tightly against the back of the housing, since the edges of the inner race are rounded. By tightening nut A, the puller jaws spread behind the bearing. Spindle (B) of the counter stay device No. 4522 is turned down on spindle (A) of extractor No. 4521. By tightening nut (C) on the counter stay device the bearing is removed with extractor No. 4521.

High performance scrapers, chisels and hammers.

Ease of use, durability and safety are the common denominators for the Bahco range of scrapers, chisels and hammers. Well balanced and made to meet the very special demands of their user, they provide perfect precision in the most sensitive and demanding applications, such as airframe maintenance and repair.

625 Scraper

625 Ergo is specially designed for precision work such as scraping windows, moulding and narrow corners. Carbide blade allows for scraping on wood, metal and concrete, such as paint, glue, varnish and rust. 2-component handle for better grip and comfort. Narrow front with precision thumbgrip. Delivered with triangular 25 mm blade and holster. Designed for convenient storage in pocket or belt. Can be fitted with profile blades 625-round, 625-drop and 625-pear.

Product code	EAN 731151+			
625	8221614	5	25	107

625 Scraper blades

Profile blades for scraper 625. Enables scraping on windows, frames and mouldings with different inverted radii. Made of cemented carbide with superior sharpness, for scraping on wood, metal and concrete. Can be turned 360° in the scraper to find different radii or sharp points. Outer diameter on round section is 17 mm / 2/3".

Product code	EAN 731151+		
625-DROP	8221638	10	3
625-PEAR	8014506	10	3
625-ROUND	8005337	10	3

650 Scraper

650 Ergo is a power scraper for universal use. Carbide blade allows for scraping on wood, metal and concrete, such as paint, glue, varnish and rust. 2-component handle for better grip and comfort. Slimlined front part for access in confined spaces. Delivered with 50 mm blade, but also readily accepts 65 mm blades.

Product code	EAN 731151+			
650	8221591	5	50	158

442/451/449 Scraper blades

The cemented-carbide blade stays sharp and productive up to 50 times longer than a conventional steel blade. Allows scraping on wood, metal and concrete. In addition the blades are precision-ground to a slightly convex shape that prevents the blade corners from scratching the work surface. 50 mm and 65 mm blades are double edged, the triangular has three edges.

- 442:** Spare blade 50 mm for scrapers 650 and 440.
- 451:** Spareblade 65 mm for scrapers 665 and 650.
- 449:** Spareblade triangular 25 mm for scrapers 625 and 448.

449	8005337	10	25	6

665 Scraper

665 Ergo is a heavy duty scraper. The double handed grip makes it a powerful choice for scraping large areas. Carbide blade allows for scraping on wood, metal and concrete, such as paint, glue, varnish and rust. 2-component handle for better grip and comfort. Slimlined front part for access in confined spaces. Delivered with 65 mm blade but also readily accepts 50 mm blade.

Product code	EAN 731151+			
665	8221607	5	65	193

424P Chisels

The 424P has been carefully engineered to satisfy most professional requirements, from smooth precision work to demanding carpentry applications.

Features and benefits:

- Specially designed two component handle maximizes control and comfort.
- Precision ground blade for maximum sharpness.
- Hardened and tempered for long lasting performance.
- Honed and ready to use.
- Protective holster included.
- Size range: 4 to 40 mm (5/32 to 1 9/16").
